

SUPER PROFIL

PRODUCTION OF MDF MOLDINGS

Super Profil is one of the leading producers in Ukraine, specializing in the production of various MDF moldings, such as skirting boards, wall panels, slatted panels, slats, architraves, crown profiles, furniture profiles, and more.

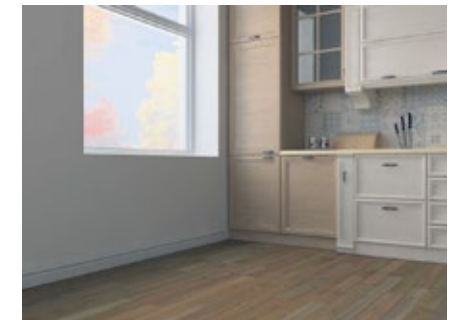

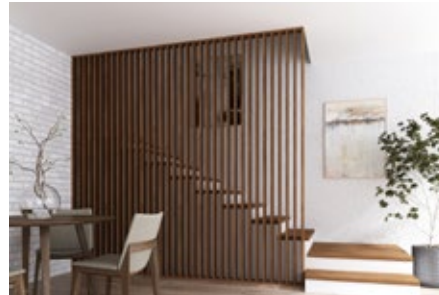

Established in 2003, our factory has extensive experience in the industry, impeccable reputation, and has been producing consistently high-quality products for over twenty years now.

Over a thousand products are produced and kept in stock. Dozens of exclusive items are created directly for furniture producers or specifically for customers who sell unique goods on the market.

We guarantee full compliance of our products with all quality requirements, as we use innovative, high-quality equipment to create products that will exceed all expectations!

The wall decorative elements that we are currently producing:

- Finish molding 1238
- Modular wall panel 12133
- Modular slats 1229
- Decorative slats 2529
- Slat dividers 2286
- Wall panel 06225
- Universal corner 0354
- MDF Skirting boards

SLATTED WALL PANEL 12117

Recently, wooden slats and slatted panels that imitate them have become particularly popular as interior and architectural solutions. They add the charm to the space and reflect the creative spirit of the design.

Wherever you need to decorate the space with original design solutions - consider our panels as an option!

They don't only imitate wooden slats successfully - they are much cheaper, incomparably easier to install and, most importantly, panels allow you to significantly expand the areas of application.

The installation does not require any additional preparations on the walls and the installer doesn't need to have any special qualifications.

Thanks to their convenience and simplicity, the popularity of these panels is gaining momentum! Wherever you need to fill the space with original design solutions - consider our panels as an option

Length-2800 mm. Width-117 mm.
Assembled width-104 mm.
Thickness - 12 mm.
Quantity in a package - 10 pcs.
Package weight-22.45 kg.

SLATTED WALL PANEL 1265

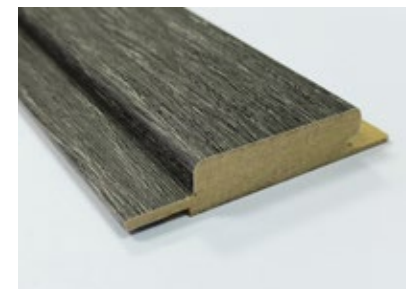

This is a slightly enlarged version of the 12117 panel.

With this model, you can significantly expand the variety of application. 1265 looks harmonious in more spacious rooms. It will appeal to those who like more massive slats. It is interesting and original to use 1265 together with 12117. It is possible to combine not only models, but also decors and tones, combining lighter and darker shades in one design!

We also kept the size proportionality between these panels! One 12117 model is equal in width to two 1265 models. That gives us the opportunity to enjoy the symmetry and perfection of the final product, in which both of these models were combined.

Length - 2800 mm
Width - 65mm
Assembled width - 52mm
Thickness - 12mm
Quantity in a package - 20 pcs.
Package weight - 22.9 kg.

START MOLDING 1234

Length - 2800 mm
Width - 34mm
Assembled width - 24mm
Thickness - 12mm
Quantity in a package - 13 pcs.
Package weight - 9.22 kg.

FINISH MOLDING 1238

Length - 2800 mm
Width - 38mm
Assembled width - 35mm
Thickness - 12mm
Quantity in a package - 13 pcs.
Package weight - 9.53 kg.

When installing our slatted wall panels, clients often face the question of how to properly finish the edges in order to achieve a harmonious look. We took care of it! Our start (1234) and finish (1238) moldings are perfect for this task. Simply start and finish your installation of our slatted wall panels with them, and you'll achieve an exceptional result!

MODULAR SLATTED PANELS

Modular slatted panels consist of two components:

- **Wall modular panel 12133**

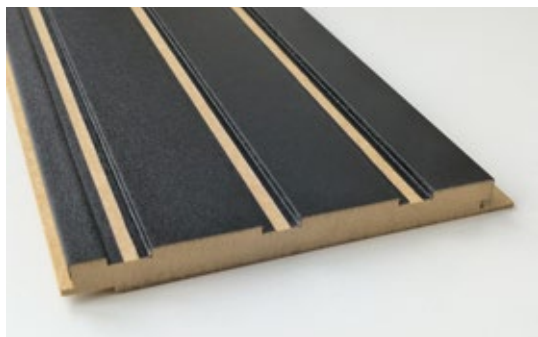

It is attached to the wall and serves as the base or the background.

- **Modular slat 1229** - the slat itself, is inserted into the corresponding slots of the modular panel.

The main advantage of this “constructor” is that we can easily create a premium interior in a short time and with cost savings. There is no need to prepare the wall, nor is there any need to use solid wood or paint and varnish. Just install the modular panel and insert the slats. That's all!

WALL MODULAR PANEL 12133

Length - 2800 mm
Width — 133mm
Assembled width — 121mm
Thickness 12mm
Quantity in a package — 5 pcs.
Package weight - 15.45 kg.

MODULAR SLAT 1229

Length - 2800 mm
Width — 29mm
Thickness — 12mm
